## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 24 & 25, drawn to a PCM system with head-end and remote unit, classified in class 725, subclass 106.
  - II. Claims 11-14 & 26-27, drawn to an alarm system, classified in class 725, subclass 108.
  - III. Claims 15-16, drawn to transmission of text and graphics, classified in class 725, subclass 468.
  - IV. Claim 17, drawn to switching between video channels, classified in class 348, subclass 487.
  - V. Claims 18-20, drawn to slot assignment with an alarm system, classified in class 370, subclass 437.
  - VI. Claim 21, drawn to channel security, classified in class 380, subclass 277.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Groups II-VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has utility as a voice and

Art Unit: 2611

data communication system over a TV network has separate utility such as an alarm system. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Terry Watt on 10/1/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
